

## Traditional Memorials

1. JTM1 - Jordan's foundations are built of reinforced concrete with a rendered finish. Corner pile footings are used where required.
2. JTM2 - Any memorial can be customised to create unique features such as the garden bed incorporated in this traditional strip kerb design.
3. JLM3 - A traditional style memorial in Australian calca granite with dressed edges. This is a practical colour granite for all country and city cemeteries.

4. JTM4 - Australian black granite kerbing enclose white river pebbles. Memorials are

manufactured to fit all lease sizes and to comply with cemetery regulations.

## Traditional Memorials

1. JTM5 - Heavy dressed finish kerbs balance this natural rock faced headstone. The granite face can be masoned to fit any size bronze plaque or embellishment.
2. JTM6 - All polished Australian black granite contributes to this stylish memorial. Note the front veneer adds to this finished look. side veneers can be used to further enhance a memorial where appropriate.
3. JTM7 - The traditional block and strip kerb memorials are very popular in single or double widths. Tablets, slopers or headstones can be used for the inscription. Flower facilities can be in vase blocks anywhere on the floor or in the kerb as shown.
