

## Restoration

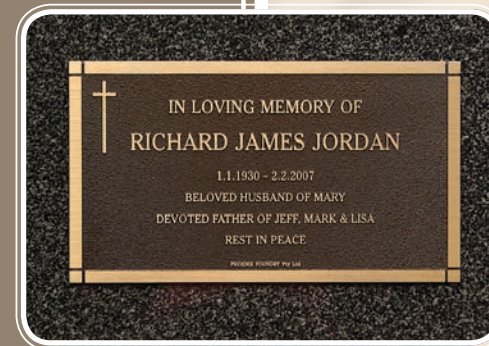

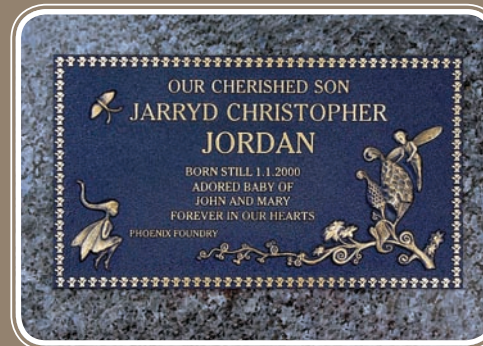

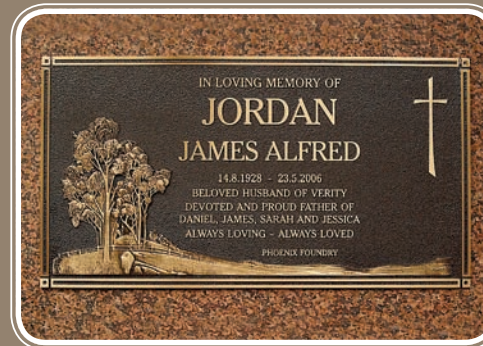

Jordans are highly experienced in the restoration of all monuments.

From a simple repainting of an inscription through to rebuilding an entire memorial including it's foundations. We use the latest methods and materials as well

as traditional techniques to return your memorial close to it's former glory. When required we will liaise with cemetery management, historical societies and Heritage authorities to ensure all requirements are met.

## Bronze Plaques

Bronze plaques are available in many sizes, styles and colours.

They can be used in conjunction with new memorials, for additional inscriptions,

cremation markers and for commemorative purposes.

They are often used where space is limited on existing monuments.

Plaques supplied by Phoenix foundry, Australia.
